

Your url has been submitted to the web's top search engines and directories. Most engines take 8-10 weeks to index new sites. Your url is in queue to be indexed by these engines.

Aesop	Status:	Successful
Submission to Aesop was successful.		

Alexa	Status:	Failed
Submission to Alexa has failed. There are a number of reasons for submission failures. These include:		
<ul style="list-style-type: none">• The engine may be too busy to take your request at this time• Your web page may not meet the criteria of the engine (missing meta tags for example)• Some search engines reject submission for pages they have already listed		

Canadaone	Status:	Successful
Submission to Canadaone was successful.		

DMOZ	Status:	Requires Manual Submission
Due to nature of DMOZ's submission process, submission to DMOZ has not yet occurred because it requires manual submission by the site owner. We have made this process easier for you by including a submission wizard in your site management area. Simply log into your SEO account and visit the "Submission Options" page to find the DMOZ submission link. DMOZ feeds or supplements listings for the following third party search engines or directories:		
<ul style="list-style-type: none">• 1001 Searches• A-Z Index

MSN **Status:** Previously Successful

Due to nature of MSN's submission process we only make one successful submission to their engine. Our research indicates that sparse submission to MSN will give you a better chance of being listed. If you have made major changes to your web site, it is possible to resubmit to MSN and other single submission search engines and directories by running the "Submission Options" tool in your account and selecting "Force Resubmission to Single Submit Engines and Directories".

NerdWorld **Status:** Successful

Submission to NerdWorld was successful.

SplatSearch **Status:** Failed

Submission to SplatSearch has failed. There are a number of reasons for submission failures. These include:

- The engine may be too busy to take your request at this time
- Your web page may not meet the criteria of the engine (missing meta tags for

example)

- Some search engines reject submission for pages they have already listed

WalHello

Status:

Successful

Submission to WalHello was successful.

Yahoo!

Status:

Previously Successful

Due to nature of Yahoo!'s submission process we only make one successful submission to their engine. Our research indicates that sparse submission to Yahoo! will give you a better chance of being listed. If you have made major changes to your web site, it is possible to resubmit to Yahoo! and other single submission search engines and directories by running the "Submission Options" tool in your account and selecting "Force Resubmission to Single Submit Engines and Directories".
